

```
1
2 1. VirtualBox > Devices > Insert Guest Additions CD Image...
3
4 2. "VBox_GAs_5.2.8" contains software intended to be automatically started. Would you like to
   run it? > Run
5   -만일 virtualBox Guest Additions : ... vboxsf failed가 나오면
6     ① reboot해서 한번 해 본다.
7     ② 그래도 안되면 아래와 같은 방법으로 하고 재부팅한다.
8       -$ sudo apt-get install virtualbox-guest-dkms
9       -$ sudo apt-get install linux-headers-virtual
10      -$ sudo reboot
11      -다시 VirtualBox > Devices > Insert Guest Additions CD Image...
12      -"VBox_GAs_5.2.8" contains software intended to be automatically started. Would you
        like to run it? > Run
13
14 3. In Windows10, Create folder.
15   -In my case, folder name is [MyShared].
16
17 4. VirtualBox > Devices > Shared Folders > Shared Folders Settings...
18
19 5. Click right-side [+] button
20   -Folder Path : [C:\MyShared]
21   -Folder Name : MyShared
22   -Check [Auto-mount]
23
24 6. /media directory에 sf_<공유한 폴더의 원래 이름>으로 디렉토리가 생성되어 있다.
25   -In my case, sf_MyShared
26
27 7. But, 공유폴더를 클릭해서 열려고 하면 사용권한이 없다는 메시지가 나타난다.
28   -This location could not be displayed.
29   -You do not have the permissions necessary to view the contents of "sf_MyShared".
30
31 8. In terminal,
32   -$ sudo adduser instructor(login한 계정) vboxsf
33     Adding user 'instructor' to group 'vboxsf' ...
34     Adding user instructor to group vboxsf
35     Done.
36
37   -$ sudo reboot
```
